SUMMARY

Full-stack developer skilled in MERN and Next.js, specialising in REST API design, AI integrations, and role-based system architecture. Proven track record of shipping production-grade applications from system design and backend infrastructure to deployment.

EXPERIENCE

*Mcleuker, **Software Engineer***

Jul 2025 - Present

Accelerated feature delivery on a live MERN stack product by owning end-to-end implementation from requirement shaping in sprint planning to production deployment. Slashed response latency on mobile app features by refactoring component logic and eliminating redundant API calls, directly improving user experience. Strengthened product reliability by designing RESTful backend APIs and system architecture patterns focused on security, scalability, and maintainability.

*Brainstorm League, LPU, **Software Developer***

Jan 2025 - Jun 2025

Drove the full build of the club's web platform from zero gathered requirements, led the developer team, and delivered on schedule, replacing all manual processes. Boosted member engagement by architecting a centralised platform that consolidated all club activity into a single organised hub.

EDUCATION

Lovely Professional University

Bachelor of Computer Applications

CGPA: 7.3

National Institute of open Schooling

12th with Commerce

Percentage: 76%

Delhi Public School

Secondary Education
