Full-stack developer transitioning into product, with hands-on experience shipping MERN stack applications and working closely with cross-functional teams. Built products end-to-end from spotting user pain points to designing features and seeing them go live. Comfortable reading system architecture, writing APIs, and sitting in the same room as engineers without needing a translator. Looking to bring that technical grounding into a product role where I can focus on the why, not just the how.

Experience

Software Engineer Intern - Mcleuker, Paris.

July 2025 - Present

- Collaborated with the team to build features for a MERN stack product got early exposure to how requirements are discussed and shaped before development starts.
- Built and optimized mobile app features to enhance user experience and performance
- Designed backend APIs and system architecture to support secure and reliable product functionality.

Software Developer - Brainstorm League, LPU

Jan 2025 - June 2025

- Helped figure out what the club's website needed to do, gathered input from members, and led the developer team that built and shipped it.
- Identified need for centralized platform; built website to improve engagement
- Organised two developer workshops and a hackathon, handling logistics, timelines, and keeping participants in the loop throughout.

Projects

Xeno Health - Hospital Management System

May 2025

- Identified a real inefficiency: hospital appointment scheduling at smaller clinics is still largely manual, causing delays and staff overhead. Designed a digital system from scratch to fix that.
- Mapped out three distinct user types - admins, doctors, and reception staff - and built role-specific workflows for each, rather than a one-size-fits-all interface.
- Built the full product on the MERN stack with JWT-based auth, role-based access control, and a clean handoff between scheduling, patient records, and staff coordination modules.

Certifications

Generative AI (Geek for Geeks)

July 2025

Skills: LLM, Transformers, NLP, Image Generation

Meta Front-end Development Professional (Coursera)

Aug 2024

Skills : React, UI/UX Design, Responsive Design, Testing, Debugging

Core Skills

Product Skills: Product Strategy, User Research, Product Analytics, Agile & Scrum, Product Roadmap

Frontend: React.js, Angular.js, Bootstrap, Ionic, Native, Next, ShadCDN

Backend: Node.js, Express.js, WebSocket, PHP, FastAPI,

Languages: HTML, CSS, JavaScript, Python, C++

Databases: MongoDB, SQL

Key Skills: Data Structures & Algorithms, Responsive Web Design, OOP

Tools & Others: Git, Postman, Netlify, REST APIs, Vercel, Render, Appsmith, Jira, Notion, Google Analytics

Education

Lovely Professional University

2025

Bachelor of Computer Applications — CGPA: 7.3

Jalandhar, Punjab

National Institute of open Schooling

2022

12th with Commerce — Percentage: 76%

Greater Noida, New Delhi

Delhi Public School

2020

Secondary Education

Mangalore, Karnataka
